THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50 USC 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVEALATION OF ITS CONTENT IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. The northeast end of the pipeline from the Lispe fields (Y3/A07) is located on the south bank of the Danube to the north of Almasfüzitő. (See sketch.)
2. There is no actual harbor. The tankers are filled partly from the pipeline and partly from floating tanks which are anchored near two landing docks. These tanks have a capacity of 1,000 tons each. When several vessels are waiting to be loaded, the smaller ones are filled while at anchor from the tanks.
3. In the event of a breakdown of the pipeline, the reserve oil from the tanks is used.
4. It is estimated that an average of approximately 1,400 - 1,600 tons of oil is loaded daily from this station.
